

## **Meeting Agenda – June xx, 2019, (time)**

### **Container Properties/ Former Rhone-Poulenc Facility, Tukwila, WA**

#### Location:

U.S. EPA Region 10 Office, 1200 Sixth Avenue, Seattle WA 98101

(note that visitors should arrive 10-15 minutes early to allow time for security screening)

#### Attendees:

John Long, Wood

Crystal Thimsen, Wood

David Blount, xxx

Jeff Davis, Davis Properties

Janette Knittel, EPA

Jennifer MacDonald, EPA

Elly Hale, EPA

#### Objectives:

- Meet one another personally and share ideas for moving this project forward
- Compare objectives for project completion
- Discuss the Corrective Measures Study and Corrective Measures Implementation timeline and ideas for efficiently completing the work
- Understand how to coordinate the RCRA work with the Lower Duwamish Waterway Superfund work in the tideflats

#### Agenda Topics:

- Introductions
- Moving forward with the CMS and CMI
  - Respondents' proposed timeline for CMS and CMI
  - Ideas for approach:
    - What are EPA's and Respondents' objectives?
    - How can we move forward on this project most efficiently while meeting objectives?
- Coordinating with Lower Duwamish Waterway Superfund work
  - LDWG's remedial design for the upper reach of LDW is starting. First step is characterization for design purposes. We can discuss whether LDWG would characterize the tideflat area (~2020/2021) or CP would want to do it instead as part of corrective action.
  - Ideas for remediation of tideflats, and how that compares with the LDW ROD.
  - Timing for remediation of tideflats compared to LDW remediation which is expected to start in ~ 5 years.
  - Is habitat restoration a possibility? How does that fit in with the timing of remediation?
- Review of next steps and action items
